

LA JOLLA VILLAGE
Endodontics

Jeffrey M. Javelet, DDS
Kevin B. Stewart, DMD

Fall Newsletter 2021

As summer ends and the fall season is in full swing we thought to reach out and update you on all the good things happening here at La Jolla Village Endodontics

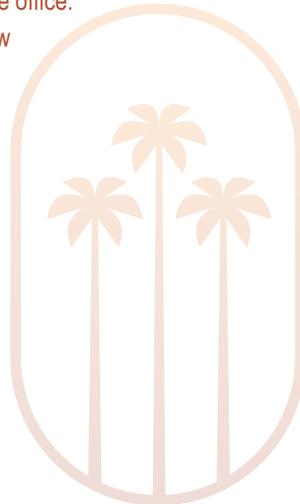

Dr. and Mrs. Stewart and baby Raylan on vacation.

We've had some exciting additions to the office this year. Dr. Stewart joined the team this spring which expanded our hours to 5 full days a week to help better accommodate our referral base. In addition, we've added three quality team members to round out the supporting front and back office crew. The schedule has worked out really well and we are able to provide the high quality care you're accustomed to while greatly increasing our office availability. Dr. Stewart has enjoyed working in La Jolla and getting to know the incredibly talented referral base that LJVE serves. Dr. Javelet has enjoyed maintaining patient care while freeing up time to spend with his family, golfing, and playing music.

There are a few minor upgrades at the office going on this fall that we feel will give an overall improvement to your patient visits. You may have already noticed that we started to switch some of our report templates in order to better fit CBCT screenshots and the intraoperative photos from the camera we've added to the microscope. Also, over the next few months we will be doing some construction work to the office.

The work will include re-doing the ceilings, lighting, window treatments, and reconfiguring some of the operatories in order to better fit some exciting new technologies that are becoming available in endodontics. Construction plans will be limited to the weekends and should not impact patient care hours.

Dr. and Mrs. Javelet at a summer wedding in Northern California.

Thank you again for all your support and the trust you give us in treating your patients.
Have a great fall season and we will see you soon!

~The LJVE Team
